Ms O'Donnell:

We are not sure how the process works but we wanted to give our reason for disagreeing with the rate increase.

1st \$52.00 for sewer alone is extremely high. I understand Harbor Village is about \$21.00 per month, Georgetown is about \$15.00 per month. Other places we have lived the average bill was \$60.00 but that included water, trash pickup and sewer.

2nd As a new resident of the subdivision, according to the letter from Mark Smith, he has subsidized the neighborhood for 10 years. Why as a new resident would we need to pay for lack of funds from 10 years ago?

3rd Our home owner's fee just went down and now the sewer is going up, both are ran by Mark Smith. It just does not seem right.

4th More detail on the expenses and revenue of Mallard Point Disposal System would be nice.

Sincerely,

Sharlyn and John Golding
